SYNTHETIC RESUME - PORTFOLIO DEMO ONLY
Fictional candidate and projects. Not a real person's resume.
No personal contact, address, employer, or education details.

PROFILE
Fictional junior developer building Python APIs and React interfaces.

SKILLS
Python, FastAPI, Pydantic, React, JavaScript, HTML, CSS, SQL using SQLite,
Git, pytest, and unittest. Experience described below is fictional project work.

PROJECTS (FICTIONAL)
Study Planner API
- Built FastAPI CRUD endpoints for study tasks and deadlines.
- Used Pydantic request validation and SQLite persistence.
- Added pagination, status filters, and automated API tests with pytest.
- Documented local installation, test commands, and sample requests.

Reading Tracker Interface
- Built a React interface for reading lists and completion status.
- Added associated form labels, keyboard access, loading states, and clear errors.
- Integrated JSON API responses and maintained session-only UI state.
- Used Git branches and small commits for project changes.

LEARNING AND LIMITS
Completed self-directed Python, React, and SQL exercises in this fictional scenario.
No professional employment, production deployment, or measured business impact is
claimed. No hands-on PostgreSQL or Docker experience is claimed.
